Response to Amendment

1. Applicant's amendment filed 10/22/2008 has been entered and made of record.

Claims 1-52 and 65-73 are cancelled.

Claims 53-64 are currently pending in the application.

In response to applicant's cancellation of claims 65-73, the rejection under 35 USC 112, second paragraph of these claims has been withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Claims 53-64 (renumbered as 1-12, respectively) are allowed.

The closest prior art to Feder (US 5,872,845) discloses an apparatus for compressing and encoding a facsimile message into an image data file, encapsulating the compressed file within a data file and automatically transferring the file to a remote computer. Feder further discloses the capability of receiving encapsulated compressed and encoded files and de-encapsulating, decompressing and decoding such files into a conventional facsimile format. The apparatus further provides a capability of storing the data and forwarding it using a high-speed modem. Feder further provides an interface to fax machines or other devices communicating via fax modems. The interface operatively connected to a series of computers linked over" a wide-area network. The network receives a file from the apparatus and sends it to the appropriate destination. The network can determine the capability the intended recipient of the file and, based on the determined capability of the recipient, send the file in a suitable format. However, Fender fails to teach or fairly suggest, at least the limitation of" the interface further

comprises one or more switches for selectively controlling electronic communication between (1) said line and said computer based system and (2) said line and said facsimile machine" as required by claim 53.

Furthermore, the prior art does not teach or suggest a digital processing interface in communication with the network interface, the digital processing interface being adapted to receive the received data in processor format, the digital processing interface being adapted to convert the received data in processor format from the processor format to facsimile format, the digital processing interface thus being adapted to provide the received data formatted according to a facsimile protocol and a facsimile component in communication with the digital processing interface for receiving the received data formatted according to facsimile protocol, the facsimile component being adapted to output a received facsimile signal formatted according to a facsimile protocol, the received facsimile signal including the received data formatted according to a facsimile protocol, the received data formatted according to a facsimile protocol thus representing the received document as required by claims 61 and 63.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
